Chock full of paranormal hijinx, this fantastic collection will hold readers spellbound and enchant with its irresistible hex appeal in a magical world where witches and conjurers exact sweet revenge on those who cross them--

????????

Did Jesus claim to be the long-awaited "messiah"? Going against much contemporary scholarship, Australian scholar Michael Bird argues that he did. He begins by exploring the messianic expectations in the Old Testament and Second Temple Jewish literature. Next, Bird points out weaknesses in current arguments that "Messiah," or "Christ," was a title given to Jesus by the early church but not used by Jesus himself. Bird then examines the Gospels and related literature, finding in Jesus's words and actions evidence that he saw himself as the messiah described in the Scriptures of Israel and believed that Israel's restoration hinged on the outcome of his ministry.

From the USA Today Bestselling author of *The Sword of the Templars* and *The Aztec Heresy* Some secrets are too great to bear... Retired Army Ranger Lt. Col. John Holliday has reluctantly settled into his teaching position at West Point when young Israeli archaeologist Rafi Wanounou comes to him with desperate news. Holliday's niece—and Rafi's fiancé—Peggy has been kidnapped. Holliday sets out with Rafi to find the only family he has left. But their search for Peggy will lead them to a trail of clues that spans across the globe, and into the heart of a conspiracy involving an ancient Egyptian legend and the darkest secrets of the Order of Templar Knights. Secrets that, once known, cannot be survived...

As Spain colonized the Americas during the sixteenth century, Spanish soldiers, bureaucrats, merchants, adventurers, physicians, ship pilots, and friars explored the natural world, gathered data, drew maps, and sent home specimens of America's vast resources of animals, plants, and minerals. This amassing of empirical knowledge about Spain's American possessions had two far-reaching effects. It overturned the medieval understanding of nature derived from Classical texts and helped initiate the modern scientific revolution. And it allowed Spain to commodify and control the natural resources upon which it built its American empire. In this book, Antonio Barrera-Osorio investigates how Spain's need for accurate information about its American colonies gave rise to empirical scientific practices and their institutionalization, which, he asserts, was Spain's chief contribution to the early scientific revolution. He also conclusively links empiricism to empire-building as he focuses on five areas of Spanish activity in America: the search for commodities in, and the ecological transformation of, the New World; the institutionalization of navigational and information-gathering practices at the Spanish Casa de la Contratación (House of Trade); the development of instruments and technologies for exploiting the natural resources of the Americas; the use of reports and questionnaires for gathering information; and the writing of natural histories about the Americas.

A doctor in the Dutch East Indies torn between his medical duty to help and his own mixed emotions; a middle-aged maidservant whose devotion to her master leads her to commit a terrible act; a hotel waiter whose love for an unapproachable aristocratic beauty culminates in an almost lyrical death and a prisoner-of-war longing to be home again in Russia. In these four stories, Stefan Zweig shows his gift for the acute analysis of emotional dilemmas. His four tragic and moving cameos of the human condition are played out against cosmopolitan and colonial backgrounds in the first half of the twentieth century.

Western er? is a specially commissioned publication produced as part of the exhibition of the same name at Tramway in December 2005. To mark the fact that 2005 was the 400th anniversary of Cervantes novel 'Don Quixote', Tramway invited art / design collective Lapland to co-curate an exhibition using the novel as a starting point. The publication documents the resulting work and contains commissioned writing from Prof Allan Ingram (University of Northumbria), Prof Jeremy Robbins (University of Edinburgh) and artists Jim Colquhoun and Susannah Thompson.

Early one morning in the coldest winter in Swedish memory, police detective Malin Fors is called away from the warm flat she shares with her teenage daughter. The naked body of a man has been found hanging from a tree on the deserted, frozen plain outside the town of Linköping. From the outset Malin is confronted with a host of unanswered questions: Who is the dead man? How did he end up in a tree? And where did the strange wounds on his body come from? Malin and her team must search for the truth in a community that seems determined to keep its secrets, and follow in the frigid wake of a killer to the darkest corners of the human heart.
