This book, first published in 1987, is about the classic free will problem, construed in terms of the implications of moral responsibility. The principal thesis is that the core issue is metaphysical: can scientific laws postulate objectively necessary connections between an action and its causal antecedents? The author concludes they cannot, and that, therefore, free will and determinism can be reconciled.

One to love. One to lead. One to Fear. Leslie Kingmaker has three weeks to choose a leader for the supernatural community, find her soul mate and break a curse. To make matters worse, the three candidates vying for leadership and her heart - a werewolf, fae and vampire - won't tell her what she needs to know to navigate the trials. One of them is supposed to betray her, and all she has to guide her is the obscure, rambling commentary in the Book of Secrets, an ancient tome that's been in her family for two thousand years. She soon discovers the candidates aren't the ones on trial - she is. The family curse is a threat to the supernatural community, and the three candidates have sworn to do whatever it takes to break the curse, even if it means killing her. In a race to understand the ancient spell that befell her family, and struggling not to lose her heart to any of the sexy, brilliant men in the process, Leslie must defy the odds and end the curse if she is to survive the trials.

This volume completes the immensely learned three-volume A History of Religious Ideas. Eliade examines the movement of Jewish thought out of ancient Eurasia, the Christian transformation of the Mediterranean area and Europe, and the rise and diffusion of Islam from approximately the sixth through the seventeenth centuries. Eliade's vast knowledge of past and present scholarship provides a synthesis that is unparalleled. In addition to reviewing recent interpretations of the individual traditions, he explores the interactions of the three religions and shows their continuing mutual influence to be subtle but unmistakable. As in his previous work, Eliade pays particular attention to heresies, folk beliefs, and cults of secret wisdom, such as alchemy and sorcery, and continues the discussion, begun in earlier volumes, of pre-Christian shamanistic practices in northern Europe and the syncretistic tradition of Tibetan Buddhism. These subcultures, he maintains, are as important as the better-known orthodoxies to a full understanding of Judaism, Christianity, and Islam.
